 Brian Johnson
 Director of Curriculum

Dear Parents:

NWEA MAP testing is administered 3 times a year in grades K-5. The NWEA MAP Test (Measures of Academic Progress) creates a personalized assessment experience by adapting to each student’s learning level—precisely measuring student progress and growth for each individual. This data is used by teachers to differentiate instruction, providing support to struggling learners and challenging advanced learners.

MAP tests are unique in that they are adaptive tests your child took on a computer. That means that the test became more difficult the more questions your child answered correctly. When your child incorrectly answered a question, the test became easier. Therefore, your child took a test specifically created for his or her learning level. In addition, your child should have had the opportunity to learn the information presented on the test because the tests are aligned with the Michigan curriculum.

Your child’s MAP results are reported in **RIT scores**. This is a different type of score than a typical test that provides a percentage correct. It is also different from many tests that provide results based on your child’s score compared to others in his or her grade. Instead, the RIT score is an equal-interval scale, like feet and inches, that is independent of grade level. As a result, we can easily measure growth in learning. This type of score increases the value of the tests as a tool to improve student learning because it enables teachers to recognize where to focus attention for your child’s learning.

Sincerely,

Brian Johnson
 Director of Curriculum
